What is the evidence on resurrection after death?

All proofs from the universe and phenomena indicate the fact that there is a constant process of reconstruction and recreation in life. There are many examples of this including the revival of earth after its death with rain.

{He brings the living out of the dead and the dead out of the living, and gives life to the earth after its death. This is how you will be brought forth.} [79] Surat ar-Rūm: 19.

Another evidence on resurrection is the perfect system of the universe that is flawless, even the extremely minute electron cannot move from one orbit to another inside the atom unless it gives or takes an amount of energy that is equal to its movement. So, how could you believe that in such a system the murderer or the oppressor could escape without being reckoned or punished by the Lord of the worlds?!

{Did you think that We created you with no purpose, and that you would not be brought back to Us? Exalted is Allah, the True Sovereign! None has the right to be worshiped except Him, the Lord of the Honorable Throne.} [80] Surat al-Mu’minūn: 115-116.

{Do those who commit evil deeds think that We will make them equal to those who believe and do righteous deeds, in this life and after their death? How poorly they judge! Allah created the heavens and earth for a true purpose, and so that every soul may be recompensed for what it has earned, and they will not be wronged.} [81] Surat al-Jāthiyah: 21-22.

Do you not notice that we lose many of our relatives and friends in this life and we know that we shall die like them one day; yet deep down we feel that we shall live forever. If man's body had been made up of matter within the framework of a material life and material laws without a soul to be resurrected and reckoned, this natural feeling of freedom would have been meaningless, as the soul rises above time and goes beyond death.
